

### Mount Nun 7135 M Climb 2026

**Fully Guided Expedition** 

Glittering with its snow-capped head, Mount Nun shines bright at the height of 7135 meters among the nearby mountain ranges in the Zanskar range and suru valley of Ladakh. The enormous Mt Nun stands right next to its twin peak Mt Kun 7077 M, the former being the tallest Himalayan mountain peak in Ladakh Climbing Mt Nun's demanding peaks is not an easy feat and requires prior experience and familiarity with mountaineering equipment.

Mount Nun Kun Massif peaks in India shares a snowy plateau that stretches 4 kilometers between Mt Nun and Mt Kun. This massif is in the Kargil district and is located in Suru valley about 250 km from Srinagar and from Leh to Kargil 216Km. The exciting part of the Mount Nun expedition is that it gives you an idea of how it would be to climb up some of the highest mountain peaks in the world even Mount Everest (8849 M).

The first-ever expedition to the majestic Mount Nun was done in 1953 by Pierre Vittoz and pioneering female mountaineer Claude Kogan. Today, travel may or may not be much easier depending upon the destination you choose (i.e., Mt. Everest, the Amazon rainforest), how you plan to get there (tour bus, cruise ship, or oxcart), and whether or not you decide to "rough it (see extreme tourism and adventure travel).

### **AFTER BASECAMP PLAN**

Climbing days (including rest days and days for contingencies)Base camp (4,600m / 15,091ft) to Camp 1 (5,420m / 17,782ft, 5-6 hours)The route involves climbing scree slopes and rocky moraine before reaching a glacier. Once we cross the glacier, we will use around 2900m of fixed lines to climb and negotiate heavily crevassed section. We will establish Camp 1 on a vast snow plateau.

#### Camp 1 (5,420m / 17,782ft) to Camp 2 (6,100m / 20,013ft, 6+ hours)

We will first cross the vast snow plateau to reach the base of the climb. From here the route involves mixed climbing on snow, ice and rock. You will use fixed lines all the way to reach Camp 2 on an exposed ledge(It is the spot), but can be a bit windy or a crevassed col.

#### Camp 2 (6,100m / 20,013ft) to Camp 3 (6,490m / 21,292ft, 4+ hours)

Everyone needs to rope up and use fixed lines on some sections to negotiate crevasses. The climb is quite easy and short depending on the condition, as the route changes almost every year. Camp 3 is situated on a small plateau.

#### Summit day (7,135m / 23,409ft, 10+ hours)

We will be doing an alpine start for the summit. It involves climbing a steep slope(450m approx 60°-70°) of snow and ice and tricky rock section(150m approx) below the summit ridge. Again, we will be using fixed lines all the way. The summit view is truly spectacular. After summiting, we will descend back to Camp 3 or as far as possible to the lower camps – e.g. Camp 2, depending on how everyone's feeling so as just to shorten the next days descend. The next day, we will descend all the way to the Base Camp.
